

Notification of Renewal of Food Safety Management System “FSSC 22000” Certification at Chita Feed Mill

Marubeni Nisshin Feed Co., Ltd. is pleased to announce that its Chita Feed Mill has successfully renewed its certification for the food safety management system “FSSC 22000.”

<Scope of Scheme Elements>

ISO 22000:2018, ISO/TS 22002-6:2016 and Additional FSSC 22000 requirements (version 6.0)

In response to growing customer demands for the safety of aquaculture feed, the Chita Feed Mill obtained FSSC 22000 certification on April 23, 2018, becoming the first aquaculture feed mill in Japan to be certified. Since then, we have continuously operated the system and worked to further improve product quality.

Going forward, the Marubeni Nisshin Feed Group will continue to contribute as a member supporting food culture to the development of Japan’s livestock and aquaculture producers, the improvement of consumer health, and consideration for the environment.

- Certification Body: The Union of Japanese Scientists and Engineers (JUSE)
- Scope of Registration: Manufacture of Compound Feeds for Farmed Fish
Food chain(sub) Category: D

■ About FSSC 22000

FSSC 22000 (Food Safety System Certification 22000), for which the Chita Feed Mill has been certified, is a food safety management system that combines ISO 22000, which requires the establishment of prerequisite programs (PRPs) as the basis for food safety, with ISO/TS 22002-6:2016, a standard specific to feed manufacturing that defines more stringent requirements for routine hygiene and operational control. Furthermore, by establishing and operating a system that complies with additional requirements such as food defense and food fraud prevention, even more rigorous and comprehensive initiatives toward ensuring food safety can be expected.

End.
