Chita Aquafeed Mill Obtains GLOBALG.A.P. CFM Certification

Marubeni Nisshin Feed Co., Ltd. (Head Office: Chuo-ku, Tokyo; Representative Director: Kazuhiro Miyauchi; hereinafter “the Company”) is pleased to announce that its Chita Aquafeed Mill obtained GLOBALG.A.P. CFM certification on August 28, 2026.

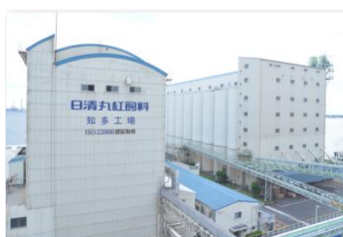

This is the first time a feed manufacturer in Japan has obtained this certification.

GLOBALG.A.P. is an internationally recognized certification system that assesses sustainable production practices with consideration for food safety, environmental protection, and occupational health and safety. CFM (Compound Feed Manufacturing) certification is specifically designed for compound feed manufacturing and establishes standards for feed safety, traceability, environmental protection, and occupational health and safety throughout the entire process, from raw material procurement to manufacturing and shipment.

Under our slogan, “Supporting life and future through food” the Company will use this certification as an opportunity to further strengthen its ability to provide customers in Japan and overseas with a stable supply of safe, reliable, and sustainable feed backed by international certification.
